

S012

Fitness Scale

Specifications:

Unit size: 320 (D) x 40 (H) mm
Maximum weight capacity: 160kgs / 352lbs
Weight graduation: 0.1kg / 0.2lb
Battery: 4 x AAA batteries
Low battery indication
Auto power off

1. LCD Display
2. kg / lb button

Preparations:

1. Insert 4 x AAA batteries properly in the battery box.
2. Select "kg" or "lb" unit from the back of scale before weighing.
3. Put the scale on a flat and solid ground when weighing is carried out.

Operating Environment:

Lay the scale onto a firm and horizontal ground. During measurement, keep the scale away from electromagnetic wave source such as microwave oven, mobile phone or wireless network.

Operation:

1. Tap on the glass surface to switch on.
1.1 ----kg/lb displays.

2. Stand onto the scale for when 0.0 appears.
Result of weight will flash on the display.
3. Power will go off automatically after stepping down.

NOTE: "FFFF" displays when the capacity is overloaded. When the scale is not in use, lay flat on the floor and do not put anything on it.

Warning:

**DO NOT STAND CLOSE TO THE EDGE OF THE SCALE.
DO NOT STAND ON THE SCALE WITH WET FEET.**
